**NAAC ACCREDITED
(2001-2006)**

Ordinances and Regulations

With Respect to

**Credit Based Semester and Grading System
(CBSGS)**

For the Programmes

Under

The Faculty of Arts, Commerce & Science

With effect from the Academic year

2011-12

R. 8433 : The definitions of the key terms used in the Credit Based Semester and Grading System introduced from the academic year 2011-12 are as under:

Program:

A **Program** is a set of courses that are linked together in an academically meaningful way and generally ends with the award of a Certificate or Diploma or Degree depending on the level of knowledge attained and the total duration of study.

B.A., B.Sc. and B.Com. are Programs.

Course

A ‘**course**’ corresponds to the word ‘subject’ used in many universities. A course is essentially a constituent of a ‘program’ and may be conceived of as a composite of several learning topics taken from a certain knowledge domain, at a certain level. All the learning topics included in a course must necessarily have academic coherence, that is, there must be a common thread linking the various components of a course. A number of linked courses considered together are in practice, a ‘program’.

Module and Unit:

A course which is generally an independent entity having its own separate identity, is also often referred to as a ‘Module’ in today’s parlance, especially when we refer to a ‘modular curricular structure’. A module may be studied in conjunction with other learning modules or studied independently. A topic within a course is treated as a Unit.

Credit Point:

Credit Point refers to the ‘Workload’ of a learner and is an index of the number of learning hours deemed for a certain segment of learning. These learning hours may include a variety of learning activities like reading, reflecting, discussing, attending lectures / counseling sessions, watching especially prepared videos, writing assignments, preparing for examinations, etc. Credits assigned for a single course always pay attention to how many hours it would take for a learner to complete a single course successfully. A single course should have, by and large a course may be assigned anywhere between 2 to 8 credit points wherein 1 credit is construed as corresponding to approximately 30 to 40 learning hours.

Credit completion and Credit accumulation:

Credit completion or Credit acquisition shall be considered to take place after the learner has successfully cleared all the evaluation criteria with respect to a single course. Thus, a learner who successfully completes a 4 CP (Credit Point) course may be considered to have collected or acquired 4 credits. His level of performance above the minimum prescribed level (viz.

grades / marks obtained) has no bearing on the number of credits collected or acquired. A learner keeps on adding more and more credits as he completes successfully more and more courses. Thus the learner ‘accumulates’ course wise credits.

Credit Bank:

The process of accumulating Credits over a period of time, leads to the idea of a ‘Credit Bank’. Conceptually, a Credit Bank in simple terms refers to stored and dynamically updated information regarding the number of Credits obtained by any given learner along with details regarding the course/s for which Credit has been given, the course-level, nature, etc. In addition, all the information regarding the number of Credits transferred to different programs or credit exemptions given may also be stored with the individual’s history. In short, this would involve maintaining all the Credit-related transactions of an individual. Credit Banking, when practiced would go a long way in facilitating credit transfers and learner mobility.

Credit Transfer:

Performance transfer

When a learner successfully completes a certain academic program, he/she is allowed to transfer his/her past performance to another academic program having some common courses and *Performance transfer* is said to have taken place.

Course exemption

Occasionally, when two academic programs offered by a single university or by more than one university, may have some common or equivalent course-content, the learner who has already completed one of these academic programs is allowed to skip these ‘equivalent’ courses while registering for the new program. The Learner is ‘*exempted*’ from ‘*relearning*’ the common or equivalent content area and from re-appearing for the concerned examinations. It is thus taken for granted that the learner has already collected in the past the credits corresponding to the exempted courses.

Block Transfer:

Block transfer refers to a group of courses, such as a completed certificate or diploma program that are accepted for transfer of credit into a degree program.

Dimensions of Credit Transfer

When a learner successfully completes the courses included in an academic program at a certain level, he/she is allowed to transfer his/her credits in some of these courses to another same-level academic program having these courses in common. This is referred to as ‘**Horizontal or Lateral Credit Transfer**’.

‘**Vertical Credit Transfer**’, sometimes is also referred to as ‘**Career Laddering**’ is said to occur when a learner’s performance in some courses within a certain academic program at a particular level is carried over to a higher-level academic program having these or equivalent courses in common.

Credit Transfer is conceived as operating along **lateral (or horizontal)** and **vertical transfers**.

Types of Credit Transfer

When the process of credit transfer takes place *within* a university department or institution, it may be called intra-institutional credit transfer; when the credit transfer process operates *across two or more* institutions/universities, this may be viewed as inter-institutional/inter-university credit transfer. Both inter/intra institutional/university credit transfer operate across levels – vertical or horizontal.

Note: The Ordinances and Regulations given below are applicable to Faculty of Arts, Commerce & Science unless and otherwise specified.

O. 5974

Duration of the B.A., B.Com. and B.Sc. programme will be of 3 years in the Semester pattern i.e. from Sem. I to Sem. VI.

The degree will be awarded to a learner who successfully completes 120 credits of the programme in period of 3 to 6 years from the year of enrollment to semester I.

If a learner does not earn 120 credits in 12 semesters from the year of enrolment to semester I, he/she may at his/her option transfer his/her performance in the existing/new program after establishing equivalence between old and new syllabus. Such a performance transfer will be decided by the Board of Studies / Ad-hoc Board / Ad hoc Committee of the concerned subject.

The admission to the program will be governed by the existing rules

O. 5975

The fees for transfer of credits or performance will be based on number of credits that a learner has to complete for award of the degree.

O. 5976

The following credit transfers will be allowed

Intra-institutional/University lateral credit transfer
Intra-institutional/University vertical credit transfer
Inter-institutional/University lateral credit transfer
Inter-institutional/University vertical credit transfer

R.8434

Credits earned at one institution for one or more courses under a given program will be accepted under another program either by the same institution or another institution either through Direct Performance Transfer or Course exemption.

R.8435 : The Scheme of Examination:

FACULTY OF SCIENCE:

The Scheme of Examination shall be divided into two components: Internal assessment and External assessment (semester end examination) for each course of the program. Internal Assessment includes Assignments, Seminars, Case Studies, Quizzes, Viva, Open book test, Unit Tests etc. For each course, there is a passing minimum for internal Assessment as 40% (16 out of 40 marks), for External / Semester End Examination 40% (24 out of 60 marks) and overall 40% (40 out of 100 marks).

The performance of the learner will be evaluated in each course in the following manner

Internal assessment	Semester end examination	Total (for each course or head of passing)
40 %	60 %	100%

The internal assessment of 40 % for each course will be as follows:

Courses with practical (for Theory Component)

Sr. No	Evaluation type	Marks
1	Two Assignments/Case study/Project	20
2	One class Test (multiple choice questions objective)	10
3	Active participation in routine class instructional deliveries(case studies/seminars//presentation)	05
4	Overall conduct as a responsible learner, manners, skill in articulation, leadership qualities demonstrated through organizing co-curricular activities, etc.	05

Practical

Each practical course can be conducted out of 50 marks with 20 marks for internal and 30 marks for external

Practical (Internal component of the Practical Course)

Sr No	Evaluation type	Marks
1	Two best practical	10
2	Journal	05
3	Viva	05

Courses with tutorials (Mathematics):

Sr No	Evaluation type	Marks

2	One class Test [Tutorial converted into test]	10
3	Active participation in routine class instructional deliveries/Tutorials	05
4	Overall conduct as a responsible learner, mannerism and articulation and exhibit of leadership qualities in organizing related academic actives	05

The semester end examination (external component) of 60% for each course will be as follows:

i) **Duration – 2 Hours**

ii) **Theory Question Paper Pattern:-**

1. There shall be four questions each of 15 marks. On each unit there will be one question and the fourth one will be based on entire syllabus.
2. All questions shall be compulsory with internal choice within the questions. (Each question will be of 20 to 23 marks with options.)
3. Question may be subdivided into sub-questions a, b, c... and the allocation of marks depend on the weightage of the topic.

The marks will be given for all examinations and they will be converted into grade (quality) points. The semester-end, final grade sheets and transcripts will have only credits, grades, grade points, SGPA and CGPA.

FACULTY OF ARTS:

The performance of the learners shall be evaluated into two components. The learner's performance shall be assessed by Internal Assessment with 40% marks in the first component by conducting the Semester End Examinations with 60% marks in the second component. The allocation of marks for the Internal Assessment and Semester End Examinations are as shown below:-

a) Internal Assessment – 40%

40 Marks

Sr. No.	Particulars	Marks
1	One periodical class test held in the given semester	10 Marks
2	Subject specific Term Work Module/assessment modes – <i>at least two</i> - as decided by the department in the beginning of the semester (like Extension/field/experimental work, Short Quiz; Objective test, lab practical, open book test etc and written assignments, Case study, Projects, Posters and exhibits etc for which the assessment is to be based on class presentations wherever applicable) to be selflessly assessed by the teacher/s concerned	20 Marks
