Students from FY / SY, CS / IT / Com classes participated in the "Artificial Flower Making" workshop. A paper flower is the art of cutting a piece of paper in various shapes and sizes and joining them together to form a realistic looking flower. Students are taught to make various flowers using the given templates and how to roll, shape, layer and assemble them. On March 05 the workshop was a new and fun experience for our students. The students enjoyed a variety of flowers. Our students absolutely loved the activity and were proud of their handmade flowers.

This helped to avoid wastage of natural resources i.e. flowers and overcome use of plastic. This activity made the students to understand the importance of being eco-friendly and ways to save environment and ultimately mother earth.
